Market Commentary

Economic data out the gate generally support a still solid, yet moderating, pace of growth. Personal income and spending data showed consumer spending continuing to rise at a steady rate. A sturdy consumer backdrop points to solid growth in Q4 consumption, and despite increasing interest rates November's release showed some newfound strength in durable goods spending. Steady gains in the hard data helped keep the University of Michigan's measure of consumer sentiment elevated in December. This is despite worries of extended drops in financial markets and softness in the housing sector. Durable goods orders rose in November, but core orders have slowed recently. Core orders reaffirm our view that the pace of equipment spending is likely to slow in 2019 due to slower global growth and trade tensions starting to weigh on U.S. activity. The housing sector has been a laggard of late, but fresh November data suggests some modest improvement. Housing starts jumped a better-than-expected 3.2%, although this was concentrated in the multifamily segment. Single-family starts fell for the third consecutive month. The 5% rebound in building permits over the month was also led by multifamily permits. Existing home sales rose 1.9%, which was better than the consensus estimate of a 0.4% drop. Most of the anecdotal evidence surrounding the housing sector suggests that after cooling off this past summer, conditions are stabilizing at a more modest level. But, we expect the recent pullback in interest rates may provide a short rush of activity from buyers that were put off by a sudden rise in mortgage rates. Source: Wells Fargo Bank. Market Commentary

Economic data out the gate generally support a still solid, yet moderating, pace of growth. Personal income and spending data showed consumer spending continuing to rise at a steady rate. A sturdy consumer backdrop points to solid growth in Q4 consumption, and despite increasing interest rates November's release showed some newfound strength in durable goods spending. Steady gains in the hard data helped keep the University of Michigan's measure of consumer sentiment elevated in December. This is despite worries of extended drops in financial markets and softness in the housing sector. Durable goods orders rose in November, but core orders have slowed recently. Core orders reaffirm our view that the pace of equipment spending is likely to slow in 2019 due to slower global growth and trade tensions starting to weigh on U.S. activity. The housing sector has been a laggard of late, but fresh November data suggests some modest improvement. Housing starts jumped a better-than-expected 3.2%, although this was concentrated in the multifamily segment. Single-family starts fell for the third consecutive month. The 5% rebound in building permits over the month was also led by multifamily permits. Existing home sales rose 1.9%, which was better than the consensus estimate of a 0.4% drop. Most of the anecdotal evidence surrounding the housing sector suggests that after cooling off this past summer, conditions are stabilizing at a more modest level. But, we expect the recent pullback in interest rates may provide a short rush of activity from buyers that were put off by a sudden rise in mortgage rates. Source: Wells Fargo Bank. Market Commentary

Economic data out the gate generally support a still solid, yet moderating, pace of growth. Personal income and spending data showed consumer spending continuing to rise at a steady rate. A sturdy consumer backdrop points to solid growth in Q4 consumption, and despite increasing interest rates November's release showed some newfound strength in durable goods spending. Steady gains in the hard data helped keep the University of Michigan's measure of consumer sentiment elevated in December. This is despite worries of extended drops in financial markets and softness in the housing sector. Durable goods orders rose in November, but core orders have slowed recently. Core orders reaffirm our view that the pace of equipment spending is likely to slow in 2019 due to slower global growth and trade tensions starting to weigh on U.S. activity. The housing sector has been a laggard of late, but fresh November data suggests some modest improvement. Housing starts jumped a better-than-expected 3.2%, although this was concentrated in the multifamily segment. Single-family starts fell for the third consecutive month. The 5% rebound in building permits over the month was also led by multifamily permits. Existing home sales rose 1.9%, which was better than the consensus estimate of a 0.4% drop. Most of the anecdotal evidence surrounding the housing sector suggests that after cooling off this past summer, conditions are stabilizing at a more modest level. But, we expect the recent pullback in interest rates may provide a short rush of activity from buyers that were put off by a sudden rise in mortgage rates. Source: Wells Fargo Bank.
