WEEKLY FINANCIAL NEWS

Financing			Market Commentary
	RATE	APR	<p>The U.S. housing market could gain 4 million new buyers this year if mortgage rates fell one percentage point, data from the National Association of Home Builders showed last week. The housing market remains out of reach for many Americans due to high mortgage rates and soaring home prices as inflation stays elevated. But the tide could be turning for Americans looking to buy a home. While 27.5 million households can afford the median priced new home at a 7.25 percent mortgage rate, NAHB said an extra 4.5 million would be able to afford buying a home if the rate dropped to 6.25 percent. That would mean 32 million households would be able to afford buying a home. Housing experts are hopeful that Americans could see a 6.25 percent 30-year mortgage rate by the end of the year, but it depends on how the Federal Reserve acts to contain inflation in the following months. Based on today's median home prices and interest rates, Americans are facing a shortage of roughly 1.5 million housing units. "This dynamic is a huge drag on the economy, the home building industry, the real estate field and various sectors of the economy that feed off the housing market," John Boyd, principal of location advisory firm The Boyd Co., told Newsweek. That number could be far lower if cities invested in more affordable housing or the Fed lowered interest rates. Source: Newsweek Suzanne Blake</p>

WEEKLY FINANCIAL NEWS

Financing			Market Commentary
	RATE	APR	<p>The U.S. housing market could gain 4 million new buyers this year if mortgage rates fell one percentage point, data from the National Association of Home Builders showed last week. The housing market remains out of reach for many Americans due to high mortgage rates and soaring home prices as inflation stays elevated. But the tide could be turning for Americans looking to buy a home. While 27.5 million households can afford the median priced new home at a 7.25 percent mortgage rate, NAHB said an extra 4.5 million would be able to afford buying a home if the rate dropped to 6.25 percent. That would mean 32 million households would be able to afford buying a home. Housing experts are hopeful that Americans could see a 6.25 percent 30-year mortgage rate by the end of the year, but it depends on how the Federal Reserve acts to contain inflation in the following months. Based on today's median home prices and interest rates, Americans are facing a shortage of roughly 1.5 million housing units. "This dynamic is a huge drag on the economy, the home building industry, the real estate field and various sectors of the economy that feed off the housing market," John Boyd, principal of location advisory firm The Boyd Co., told Newsweek. That number could be far lower if cities invested in more affordable housing or the Fed lowered interest rates. Source: Newsweek Suzanne Blake</p>

WEEKLY FINANCIAL NEWS

Financing			Market Commentary
	RATE	APR	<p>The U.S. housing market could gain 4 million new buyers this year if mortgage rates fell one percentage point, data from the National Association of Home Builders showed last week. The housing market remains out of reach for many Americans due to high mortgage rates and soaring home prices as inflation stays elevated. But the tide could be turning for Americans looking to buy a home. While 27.5 million households can afford the median priced new home at a 7.25 percent mortgage rate, NAHB said an extra 4.5 million would be able to afford buying a home if the rate dropped to 6.25 percent. That would mean 32 million households would be able to afford buying a home. Housing experts are hopeful that Americans could see a 6.25 percent 30-year mortgage rate by the end of the year, but it depends on how the Federal Reserve acts to contain inflation in the following months. Based on today's median home prices and interest rates, Americans are facing a shortage of roughly 1.5 million housing units. "This dynamic is a huge drag on the economy, the home building industry, the real estate field and various sectors of the economy that feed off the housing market," John Boyd, principal of location advisory firm The Boyd Co., told Newsweek. That number could be far lower if cities invested in more affordable housing or the Fed lowered interest rates. Source: Newsweek Suzanne Blake</p>
