Market Commentary

Fear that the Fed would continue to hike interest rates led to a weak outrun for housing activity at the end of last year. Affordability concerns deterred potential buyers from making a purchase, and builders slashed home prices to shed inventories. With decreased demand and an uncertain outlook, starts weakened. The Fed's pivot on monetary policy appears to have arrested the slide in housing starts but has not reversed it. Home prices and mortgage rates have both trended lower and remain below their year-ago levels. Mortgage applications surged in March, suggesting the cooling in prices is driving greater demand, while builder confidence has also rebounded from last year's lows. We should see a modest increase in March housing starts, as recent conditions suggest a more upbeat housing market headed into the spring selling season. Other data released this week also suggest the labor market remains tight, but point to a more moderate pace of hiring ahead. Total job openings continue to outnumber unemployed workers, but the vacancy rate fell to a one-year low in February. Job openings can bounce around from month to month and are subject to big revisions, so the 538K drop in openings in February does not unequivocally signal a collapse in demand for workers. It does, however, offer another sign that the labor market may be nearing an inflection point, as temporary hiring has also slowed and consumers' views of the labor market have deteriorated slightly. There are tentative signs of the labor market softening. Consumers are also facing a bit more inflation. The consumer price index rose 0.4% in March, its largest gain in more than a year. Market Commentary

Fear that the Fed would continue to hike interest rates led to a weak outrun for housing activity at the end of last year. Affordability concerns deterred potential buyers from making a purchase, and builders slashed home prices to shed inventories. With decreased demand and an uncertain outlook, starts weakened. The Fed's pivot on monetary policy appears to have arrested the slide in housing starts but has not reversed it. Home prices and mortgage rates have both trended lower and remain below their year-ago levels. Mortgage applications surged in March, suggesting the cooling in prices is driving greater demand, while builder confidence has also rebounded from last year's lows. We should see a modest increase in March housing starts, as recent conditions suggest a more upbeat housing market headed into the spring selling season. Other data released this week also suggest the labor market remains tight, but point to a more moderate pace of hiring ahead. Total job openings continue to outnumber unemployed workers, but the vacancy rate fell to a one-year low in February. Job openings can bounce around from month to month and are subject to big revisions, so the 538K drop in openings in February does not unequivocally signal a collapse in demand for workers. It does, however, offer another sign that the labor market may be nearing an inflection point, as temporary hiring has also slowed and consumers' views of the labor market have deteriorated slightly. There are tentative signs of the labor market softening. Consumers are also facing a bit more inflation. The consumer price index rose 0.4% in March, its largest gain in more than a year. Market Commentary

Fear that the Fed would continue to hike interest rates led to a weak outrun for housing activity at the end of last year. Affordability concerns deterred potential buyers from making a purchase, and builders slashed home prices to shed inventories. With decreased demand and an uncertain outlook, starts weakened. The Fed's pivot on monetary policy appears to have arrested the slide in housing starts but has not reversed it. Home prices and mortgage rates have both trended lower and remain below their year-ago levels. Mortgage applications surged in March, suggesting the cooling in prices is driving greater demand, while builder confidence has also rebounded from last year's lows. We should see a modest increase in March housing starts, as recent conditions suggest a more upbeat housing market headed into the spring selling season. Other data released this week also suggest the labor market remains tight, but point to a more moderate pace of hiring ahead. Total job openings continue to outnumber unemployed workers, but the vacancy rate fell to a one-year low in February. Job openings can bounce around from month to month and are subject to big revisions, so the 538K drop in openings in February does not unequivocally signal a collapse in demand for workers. It does, however, offer another sign that the labor market may be nearing an inflection point, as temporary hiring has also slowed and consumers' views of the labor market have deteriorated slightly. There are tentative signs of the labor market softening. Consumers are also facing a bit more inflation. The consumer price index rose 0.4% in March, its largest gain in more than a year.
