WEEKLY FINANCIAL NEWS

Financing			Market Commentary
	RATE	APR	<p>One unique challenge the FOMC may run into as it commences with rate cuts is the housing market, where a structural imbalance between strong underlying demand and scare supply threatens to clog a critical channel through which monetary policy typically works. Amid a growing consensus that a number of rate cuts are on the 2024 calendar, mortgage rates have declined from about 7.2% in May to about 6.5% currently. The new home market continues to outperform. New home sales jumped 10.6% to a 739K-unit pace in July, helping offset a sharp decline over the previous two months. Home builders have dodged the full effects of restrictive monetary policy by providing mortgage-rate buydowns and other pricing incentives for buyers. As a result, new home sales have held up comparatively well this cycle. The stronger pace of sales during July brought down the supply of available new homes slightly, with months supply falling to 7.5 months. Although improved, new home supply is still elevated, most notably in the major homebuilding markets of the South and West regions. Consequently, builders now appear to be scaling back production for the time being. All told, lower rates should eventually provide a boost to the residential sector, but the positive impulse could take longer to be felt on account of poor affordability conditions and elevated supply of new construction. WEEKLY FINANCIAL NEWS

Financing			Market Commentary
	RATE	APR	<p>One unique challenge the FOMC may run into as it commences with rate cuts is the housing market, where a structural imbalance between strong underlying demand and scare supply threatens to clog a critical channel through which monetary policy typically works. Amid a growing consensus that a number of rate cuts are on the 2024 calendar, mortgage rates have declined from about 7.2% in May to about 6.5% currently. The new home market continues to outperform. New home sales jumped 10.6% to a 739K-unit pace in July, helping offset a sharp decline over the previous two months. Home builders have dodged the full effects of restrictive monetary policy by providing mortgage-rate buydowns and other pricing incentives for buyers. As a result, new home sales have held up comparatively well this cycle. The stronger pace of sales during July brought down the supply of available new homes slightly, with months supply falling to 7.5 months. Although improved, new home supply is still elevated, most notably in the major homebuilding markets of the South and West regions. Consequently, builders now appear to be scaling back production for the time being. All told, lower rates should eventually provide a boost to the residential sector, but the positive impulse could take longer to be felt on account of poor affordability conditions and elevated supply of new construction. WEEKLY FINANCIAL NEWS

Financing			Market Commentary
CONV	RATE	APR	<p>One unique challenge the FOMC may run into as it commences with rate cuts is the housing market, where a structural imbalance between strong underlying demand and scarce supply threatens to clog a critical channel through which monetary policy typically works. Amid a growing consensus that a number of rate cuts are on the 2024 calendar, mortgage rates have declined from about 7.2% in May to about 6.5% currently. The new home market continues to outperform. New home sales jumped 10.6% to a 739K-unit pace in July, helping offset a sharp decline over the previous two months. Home builders have dodged the full effects of restrictive monetary policy by providing mortgage-rate buydowns and other pricing incentives for buyers. As a result, new home sales have held up comparatively well this cycle. The stronger pace of sales during July brought down the supply of available new homes slightly, with months supply falling to 7.5 months. Although improved, new home supply is still elevated, most notably in the major homebuilding markets of the South and West regions. Consequently, builders now appear to be scaling back production for the time being. All told, lower rates should eventually provide a boost to the residential sector, but the positive impulse could take longer to be felt on account of poor affordability conditions and elevated supply of new construction.
