WEEKLY FINANCIAL NEWS

Financing			Market Commentary
CONV	RATE	APR	A downshift in the residential sector is another sign that overall growth is easing. Total housing starts bested expectations and turned up during June. However, the upturn occurred largely as a result of a surge in multifamily starts, which overshadowed yet another decline in single-family construction. Until recently, builders' ability to lower prices and buy down rates has shielded single family construction from tighter monetary policy. But now higher rates finally appear to be restricting activity and single-family starts and permits have both weakened over the past several months. Similarly, the NAHB Housing Market Index slipped for the third consecutive month in July, which only adds to the evidence that builders are beginning to scale back production. The upturn in multifamily starts during June was notable in that it represents a potential green shoot for apartment and condo development, which has pulled back sharply over the past year alongside deteriorating apartment market fundamentals and tighter credit conditions. That noted, multifamily starts are highly volatile on a monthly basis, and it is too soon to say the segment is on the road to recovery. WEEKLY FINANCIAL NEWS

Financing			Market Commentary
CONV	RATE 6.50%	APR 6.59%	<p>A downshift in the residential sector is another sign that overall growth is easing. Total housing starts bested expectations and turned up during June. However, the upturn occurred largely as a result of a surge in multifamily starts, which overshadowed yet another decline in single-family construction. Until recently, builders' ability to lower prices and buy down rates has shielded single family construction from tighter monetary policy. But now higher rates finally appear to be restricting activity and single-family starts and permits have both weakened over the past several months. Similarly, the NAHB Housing Market Index slipped for the third consecutive month in July, which only adds to the evidence that builders are beginning to scale back production. The upturn in multifamily starts during June was notable in that it represents a potential green shoot for apartment and condo development, which has pulled back sharply over the past year alongside deteriorating apartment market fundamentals and tighter credit conditions. That noted, multifamily starts are highly volatile on a monthly basis, and it is too soon to say the segment is on the road to recovery. WEEKLY FINANCIAL NEWS

Financing			Market Commentary
	RATE	APR	A downshift in the residential sector is another sign that overall growth is easing. Total housing starts bested expectations and turned up during June. However, the upturn occurred largely as a result of a surge in multifamily starts, which overshadowed yet another decline in single-family construction. Until recently, builders' ability to lower prices and buy down rates has shielded single family construction from tighter monetary policy. But now higher rates finally appear to be restricting activity and single-family starts and permits have both weakened over the past several months. Similarly, the NAHB Housing Market Index slipped for the third consecutive month in July, which only adds to the evidence that builders are beginning to scale back production. The upturn in multifamily starts during June was notable in that it represents a potential green shoot for apartment and condo development, which has pulled back sharply over the past year alongside deteriorating apartment market fundamentals and tighter credit conditions. That noted, multifamily starts are highly volatile on a monthly basis, and it is too soon to say the segment is on the road to recovery.
