NATIONAL BUILDER DIVISION

WEEKLY FINANCIAL NEWS

Financing			Market Commentary
CONV	RATE 6.88%	APR 6.95%	The nation might be in the clutches of a dire housing shortage, but builders won't be putting up enough new homes this year to make much of a dent. Housing starts, which is when construction has begun but not yet completed, are expected to fall about 744,000 single-family homes in 2023 as builders continue to pull back, according to the National Association of Home Builders forecast. That's down about 12% from last year. However, NAHB expects new construction will rebound in the second half of the year, giving a boost to the overall economy. There is currently a deficit of about 1.5 million homes in relation to the number that is considered necessary across the U.S. Builders would need to put up about 1.1 million homes this year to chip away at that housing shortage, which is at least partly responsible for soaring prices. But builders are facing their own challenges. Demand for new homes has faltered as buyers are struggling to afford these residences with higher mortgage rates. New homes are typically more expensive than older ones. When mortgage rates and prices fall, many buyers are expected to jump back into the market. "The fundamental challenge to the housing remains a lack of homes for sale," says Dietz. "So when affordability improves, that will create demand for new homebuilding." NATIONAL BUILDER DIVISION

WEEKLY FINANCIAL NEWS

Financing			Market Commentary
CONV			The nation might be in the clutches of a dire housing shortage, but builders won't be putting up enough new homes this year to make much of a dent. Housing starts, which is when construction has begun but not yet completed, are expected to fall about 744,000 single-family homes in 2023 as builders continue to pull back, according to the National Association of Home Builders forecast. That's down about 12% from last year. However, NAHB expects new construction will rebound in the second half of the year, giving a boost to the overall economy. There is currently a deficit of about 1.5 million homes in relation to the number that is considered necessary across the U.S. Builders would need to put up about 1.1 million homes this year to chip away at that housing shortage, which is at least partly responsible for soaring prices. But builders are facing their own challenges. Demand for new homes has faltered as buyers are struggling to afford these residences with higher mortgage rates. New homes are typically more expensive than older ones. When mortgage rates and prices fall, many buyers are expected to jump back into the market. "The fundamental challenge to the housing remains a lack of homes for sale," says Dietz. "So when affordability improves, that will create demand for new homebuilding." NATIONAL BUILDER DIVISION

WEEKLY FINANCIAL NEWS

Financing			Market Commentary
CONV	RATE 6.88%	APR 6.95%	The nation might be in the clutches of a dire housing shortage, but builders won't be putting up enough new homes this year to make much of a dent. Housing starts, which is when construction has begun but not yet completed, are expected to fall about 744,000 single-family homes in 2023 as builders continue to pull back, according to the National Association of Home Builders forecast. That's down about 12% from last year. However, NAHB expects new construction will rebound in the second half of the year, giving a boost to the overall economy. There is currently a deficit of about 1.5 million homes in relation to the number that is considered necessary across the U.S. Builders would need to put up about 1.1 million homes this year to chip away at that housing shortage, which is at least partly responsible for soaring prices. But builders are facing their own challenges. Demand for new homes has faltered as buyers are struggling to afford these residences with higher mortgage rates. New homes are typically more expensive than older ones. When mortgage rates and prices fall, many buyers are expected to jump back into the market. "The fundamental challenge to the housing remains a lack of homes for sale," says Dietz. "So when affordability improves, that will create demand for new homebuilding."
