WEEKLY FINANCIAL NEWS

Financing		Market Commentary									
CONV	RATE 6.88%	APR 6.97%	When the pandemic hit the U.S. in the spring of 2020, construction projects of all kinds froze and workers were laid off in huge numbers. But as remote work took hold and many sought larger homes, demand for new residential construction quickly picked up and workers were back on the job. That momentum has kept up. Over the last four years, the industry has seen a surge in demand for labor amid a nationwide shortage of housing and a surge in new government funding for major infrastructure projects. This year, the construction industry is short about 500,000 workers - and that's "on top of the normal pace of hiring," according to a January 2024 news release from the trade group Associated Builders and Contractors. The worker shortage is now the biggest issue builders are facing experts say. While the rising cost of housing is in large part a result of restrictive zoning laws and building regulations, the construction worker shortage is also pushing up home costs. Fewer construction workers means less - and slower - residential construction, which in turn leads to higher home prices, according to a 2023 report from researchers at the university of Utah and the University of Wisconsin-Madison. FHA	6.50%	7.28%	
10 Yr Yield	4.50%		
			When the pandemic hit the U.S. in the spring of 2020, construction projects of all kinds froze and workers were laid off in huge numbers. But as remote work took hold and many sought larger homes, demand for new residential construction quickly picked up and workers were back on the job. That momentum has kept up. Over the last four years, the industry has seen a surge in demand for labor amid a nationwide shortage of housing and a surge in new government funding for major infrastructure projects. This year, the construction industry is short about 500,000 workers - and that's "on top of the normal pace of hiring," according to a January 2024 news release from the trade group Associated Builders and Contractors. The worker shortage is now the biggest issue builders are facing experts say. While the rising cost of housing is in large part a result of restrictive zoning laws and building regulations, the construction worker shortage is also pushing up home costs. Fewer construction workers means less - and slower - residential construction, which in turn leads to higher home prices, according to a 2023 report from researchers at the university of Utah and the University of Wisconsin-Madison. 		<p>When the pandemic hit the U.S. in the spring of 2020, construction projects of all kinds froze and workers were laid off in huge numbers. But as remote work took hold and many sought larger homes, demand for new residential construction quickly picked up and workers were back on the job. That momentum has kept up. Over the last four years, the industry has seen a surge in demand for labor amid a nationwide shortage of housing and a surge in new government funding for major infrastructure projects. This year, the construction industry is short about 500,000 workers - and that's "on top of the normal pace of hiring," according to a January 2024 news release from the trade group Associated Builders and Contractors. The worker shortage is now the biggest issue builders are facing experts say. While the rising cost of housing is in large part a result of restrictive zoning laws and building regulations, the construction worker shortage is also pushing up home costs. Fewer construction workers means less - and slower - residential construction, which in turn leads to higher home prices, according to a 2023 report from researchers at the university of Utah and the University of Wisconsin-Madison. Source: Business Insider Eliza Relman/Madison Hoff</p>
