			While the official government count isn't out until the end of the month, sales of newly built homes jumped 55% annually in June, according to a monthly survey by John Burns Real Estate Consulting, which has historically mirrored the U.S. Census report. It was the largest gain since homebuilding began again following the epic housing crash a decade ago. It is also the highest pace of sales growth since the height of the unprecedented housing boom in 2005. That expansion was driven by negligent lending in the subprime mortgage market. This boom appears to be driven by the coronavirus pandemic. "The anecdotal evidence is overwhelming. Sales in the distant commuter areas are the most robust," said John Burns, founder and CEO of JBRC. "I believe a lot of computer-oriented people have proven to their co-workers that they can be productive from home, and have sensed, or officially been given the green light, to work from home at least a significant portion of the time after a vaccine has been found." Builders can raise prices because they are seeing a new buyer today, more serious and more impatient than ever. Buyer traffic is converting into sales at a record rate. In addition, consumers are largely choosing homes already built, even in the luxury segment. Source: Diana Olick CNBC Real Estate News

			While the official government count isn't out until the end of the month, sales of newly built homes jumped 55% annually in June, according to a monthly survey by John Burns Real Estate Consulting, which has historically mirrored the U.S. Census report. It was the largest gain since homebuilding began again following the epic housing crash a decade ago. It is also the highest pace of sales growth since the height of the unprecedented housing boom in 2005. That expansion was driven by negligent lending in the subprime mortgage market. This boom appears to be driven by the coronavirus pandemic. "The anecdotal evidence is overwhelming. Sales in the distant commuter areas are the most robust," said John Burns, founder and CEO of JBRC. "I believe a lot of computer-oriented people have proven to their co-workers that they can be productive from home, and have sensed, or officially been given the green light, to work from home at least a significant portion of the time after a vaccine has been found." Builders can raise prices because they are seeing a new buyer today, more serious and more impatient than ever. Buyer traffic is converting into sales at a record rate. In addition, consumers are largely choosing homes already built, even in the luxury segment. Source: Diana Olick CNBC Real Estate News

WEEKLY FINANCIAL NEWS

Financing			Market Commentary
CONV	RATE 2.90%	APR 3.17%	
FHA	2.86%	3.48%	While the official government count isn't out until the end of the month, sales of newly built homes jumped 55% annually in June, according to a monthly survey by John Burns Real Estate Consulting, which has historically mirrored the U.S. Census report. It was the largest gain since homebuilding began again following the epic housing crash a decade ago. It is also the highest pace of sales growth since the height of the unprecedented housing boom in 2005. That expansion was driven by negligent lending in the subprime mortgage market. This boom appears to be driven by the coronavirus pandemic. "The anecdotal evidence is overwhelming. Sales in the distant commuter areas are the most robust," said John Burns, founder and CEO of JBRC. "I believe a lot of computer-oriented people have proven to their co-workers that they can be productive from home, and have sensed, or officially been given the green light, to work from home at least a significant portion of the time after a vaccine has been found." Builders can raise prices because they are seeing a new buyer today, more serious and more impatient than ever. Buyer traffic is converting into sales at a record rate. In addition, consumers are largely choosing homes already built, even in the luxury segment. Source: Diana Olick CNBC Real Estate News
