2.25%			2.91%
10 Yr Yield			1.26%
			We expect housing starts cooled to a 1,602K annual rate in July, after beating expectations in June. June's increase brought housing starts more in line with building permits, which had been running well ahead of starts over the past year. While building permits normally lead housing starts, shortages of material and labor have led to a persistent rise in the number of homes authorized but not yet started. This backlog remains elevated, but the slowdown in permits over the past few months suggests the momentum in home building has started to fade. Much like other sectors of the economy, this appears to be more of a supply problem than a demand problem. The lack of land, materials and labor has made it difficult for builders to ramp up production to meet the surge in demand over the past year. Going forward, we still expect home building to remain strong relative to its pre-pandemic trend, especially once supply constraints start to ease. We expect housing starts cooled to a 1,602K annual rate in July, after beating expectations in June. June's increase brought housing starts more in line with building permits, which had been running well ahead of starts over the past year. While building permits normally lead housing starts, shortages of material and labor have led to a persistent rise in the number of homes authorized but not yet started. This backlog remains elevated, but the slowdown in permits over the past few months suggests the momentum in home building has started to fade. Much like other sectors of the economy, this appears to be more of a supply problem than a demand problem. The lack of land, materials and labor has made it difficult for builders to ramp up production to meet the surge in demand over the past year. Going forward, we still expect home building to remain strong relative to its pre-pandemic trend, especially once supply constraints start to ease.
