## WEEKLY FINANCIAL NEWS

Financing			Market Commentary					
<b>CONV</b>			Fed Chair Jerome Powell made headlines last week, when he spoke at the Brookings Institution on November 30. In a speech that was largely devoted to discussing the elevated rate of inflation at present and the challenges the FOMC faces in bringing it to heel. Powell's comment that "the time for moderating the pace of rate increases may come as soon as the December meeting" garnered most of the attention. We have been forecasting for some time that the Committee would dial back the magnitude of its rate hikes from 75 bps, which have occurred at each of the last four policy meetings, to 50 bps on December 14. Powell's comments reinforce our expectation that the FOMC will indeed raise its target range for the fed funds rate by 50 bps at its next meeting. But a smaller rate of increase should not be interpreted as a "pivot" to more accommodative policy. Powell went on to say "given our progress in lightening policy, the timing of that moderation is far less significant than the questions of how much further we will need to raise rates." He also suggested that the Committee will need to hold rates in restrictive territory for some time to ensure that inflation is on a trajectory that returns to the Fed's 2% target. 			Fed Chair Jerome Powell made headlines last week, when he spoke at the Brookings Institution on November 30. In a speech that was largely devoted to discussing the elevated rate of inflation at present and the challenges the FOMC faces in bringing it to heel. Powell's comment that "the time for moderating the pace of rate increases may come as soon as the December meeting" garnered most of the attention. We have been forecasting for some time that the Committee would dial back the magnitude of its rate hikes from 75 bps, which have occurred at each of the last four policy meetings, to 50 bps on December 14. Powell's comments reinforce our expectation that the FOMC will indeed raise its target range for the fed funds rate by 50 bps at its next meeting. But a smaller rate of increase should not be interpreted as a "pivot" to more accommodative policy. Powell went on to say "given our progress in lightening policy, the timing of that moderation is far less significant than the questions of how much further we will need to raise rates." He also suggested that the Committee will need to hold rates in restrictive territory for some time to ensure that inflation is on a trajectory that returns to the Fed's 2% target. ### WEEKLY FINANCIAL NEWS

Financing			Market Commentary				
<b>CONV</b>		<b>RATE</b>	<b>APR</b>				
<b>FHA</b>		<b>6.75%</b>	<b>7.08%</b>				
<b>10 Yr Yield</b>		<b>6.00%</b>	<b>6.13%</b>				
<b>10 Yr Yield</b>		<b>3.58%</b>	Fed Chair Jerome Powell made headlines last week, when he spoke at the Brookings Institution on November 30. In a speech that was largely devoted to discussing the elevated rate of inflation at present and the challenges the FOMC faces in bringing it to heel. Powell's comment that "the time for moderating the pace of rate increases may come as soon as the December meeting" garnered most of the attention. We have been forecasting for some time that the Committee would dial back the magnitude of its rate hikes from 75 bps, which have occurred at each of the last four policy meetings, to 50 bps on December 14. Powell's comments reinforce our expectation that the FOMC will indeed raise its target range for the fed funds rate by 50 bps at its next meeting. But a smaller rate of increase should not be interpreted as a "pivot" to more accommodative policy. Powell went on to say "given our progress in lightening policy, the timing of that moderation is far less significant than the questions of how much further we will need to raise rates." He also suggested that the Committee will need to hold rates in restrictive territory for some time to ensure that inflation is on a trajectory that returns to the Fed's 2% target.
