Last week's existing and new home sales data underscored how deteriorating affordability conditions are suppressing demand in the housing sector. This week's batch of housing market data served to reinforce this trend. Despite some increases in inventory heading into the spring selling season, home price growth has yet to cool. Nationally, home prices advanced 6.5% over the year in March per the latest data from S&P CoreLogic. Ongoing price appreciation has pushed home prices 2.7% above their previous June 2022 peak. What's more, price appreciation seems to be accelerating even in the face of lagging sales and growing inventory. Seasonally adjusted home prices grew at a three-month annualized rate of 4.9% in March, up from a 3.5% run rate in January. Rising prices combined with mortgage rates averaging north of 7% for the past two months have resulted in a broad retreat in homebuying. Leading indicators for the housing market signal that the route is likely just beginning. Mortgage applications for purchase fell to a three-month low in May. Home sales are still running above recent lows, but until affordability conditions improve--whether through increasing inventory and/or accommodative monetary policy--the housing market will likely remain in stall speed. ### WEEKLY FINANCIAL NEWS

Financing			Market Commentary
<b>CONV</b>	<b>RATE</b> <b>6.88%</b>	<b>APR</b> <b>6.99%</b>	
<b>FHA</b>	<b>6.50%</b>	<b>7.32%</b>	Last week's existing and new home sales data underscored how deteriorating affordability conditions are suppressing demand in the housing sector. This week's batch of housing market data served to reinforce this trend. Despite some increases in inventory heading into the spring selling season, home price growth has yet to cool. Nationally, home prices advanced 6.5% over the year in March per the latest data from S&P CoreLogic. Ongoing price appreciation has pushed home prices 2.7% above their previous June 2022 peak. What's more, price appreciation seems to be accelerating even in the face of lagging sales and growing inventory. Seasonally adjusted home prices grew at a three-month annualized rate of 4.9% in March, up from a 3.5% run rate in January. Rising prices combined with mortgage rates averaging north of 7% for the past two months have resulted in a broad retreat in homebuying. Leading indicators for the housing market signal that the route is likely just beginning. Mortgage applications for purchase fell to a three-month low in May. Home sales are still running above recent lows, but until affordability conditions improve-whether through increasing inventory and/or accommodative monetary policy-the housing market will likely remain in stall speed. Last week's existing and new home sales data underscored how deteriorating affordability conditions are suppressing demand in the housing sector. This week's batch of housing market data served to reinforce this trend. Despite some increases in inventory heading into the spring selling season, home price growth has yet to cool. Nationally, home prices advanced 6.5% over the year in March per the latest data from S&P CoreLogic. Ongoing price appreciation has pushed home prices 2.7% above their previous June 2022 peak. What's more, price appreciation seems to be accelerating even in the face of lagging sales and growing inventory. Seasonally adjusted home prices grew at a three-month annualized rate of 4.9% in March, up from a 3.5% run rate in January. Rising prices combined with mortgage rates averaging north of 7% for the past two months have resulted in a broad retreat in homebuying. Leading indicators for the housing market signal that the route is likely just beginning. Mortgage applications for purchase fell to a three-month low in May. Home sales are still running above recent lows, but until affordability conditions improve--whether through increasing inventory and/or accommodative monetary policy--the housing market will likely remain in stall speed.
